

Upcoming detour information for the TH 60 Project (SP 4006-35)

The Phase 1 detour for SP 4006-35 will be coming to an end on July 16.

The planned Phase 2 detour is intended to use TH 13 in Waterville, north to the intersection of Le Sueur CR 12 (Tetonka Lake Rd.), west to the intersection of Le Sueur CR 11. South on CR 11 to the City of Elysian at the intersection with TH 60 and then west on TH 60 toward the City of Madison Lake.

In an effort to take advantage of an opportunity to perform the remaining construction work during the favorable summer weather/longer day light and to expedite the completion of the project, a minor modification to the Phase 2 detour will be implemented, weather dependent, on July 9th.

This short-term modification will incorporate the majority of the Phase 2 detour with the exception that instead of traffic being directed west on TH 60 at the intersection with CR 11, traffic will be detour east on TH 60 to the intersection of Waseca CR 3 (East Elysian Lake Rd.) and then follow the Phase 1 detour toward Janesville.

TH 60 east of the intersection with Waseca CR 3 is intended to be closed to through traffic on July 9, which will allow the contractor to begin various types of the planned work on TH 60. The planned Phase 2 detour will be implemented on July 16.

Also, 2 Portable Changeable Message Boards (PCMB) have been installed either side of the intersection of Le Sueur CR 11 on CR 12 describing the “all way stops” condition which will be implemented beginning on July 9.
