Chapter 17 Cross Sections

Utilities and R/W on Cross Sections

Reminder to display utilities, existing R/W and proposed R/W on the cross sections. This is required as part of our Utility Coordination as well as to ensure construction is within R/W.

For more information on the Utility Coordination process as it relates to project delivery see <http://www.dot.state.mn.us/utility/projectdelivery.html>

Earthwork on Cross Sections

Generally, it is helpful to show earthwork quantities are on the cross sections. It provides a good check on the quantities.
