SEASONAL LOAD LIMIT NOTIFICATION

Date: March 3, 2022

Subject: Winter load increases end in south and southeast seasonal load limit (SLL) zones

The Minnesota Department of Transportation will end winter load increases in the SOUTH and SOUTHEAST SLL zones Monday, March 7, 2022 at 12:01 AM.

MnDOT will continue to evaluate weather forecasts to determine the start date for spring load restrictions in these zones.

Frost zones and restricted routes can be found on the [MnDOT load limits map](#).

Start and end dates and other load limit information are shown at mndot.gov/loadlimits.

Overweight permits for more than 80,000 pound gross vehicle weight will continue and new permits will be issued if all axle and group weights are legal ([axle weight limits](#)).

Full-summer overweight permits can be issued, during the spring load restriction period, for travel on the interstate system only.

Middle-range overweight permits become available within each frost zone when spring load restrictions are lifted. Full-summer overweight permits become available two to three weeks after spring load restrictions are lifted.

Ending dates for spring load restrictions are variable and based on how weather is affecting roadway strength.

MnDOT will report start and end dates on its 24-hour automated message center at 1-800-723-6543 for the U.S. and Canada, and locally at 651-366-5400 for the Minneapolis/St. Paul area.

For questions about legal axle weight during SLR; Gross Vehicle Weight Schedule, call:
