

Hwy 210 Reconstruction at I-94 (West) - Fergus Falls

MnDOT is reconstructing Hwy 210 at the west junction with I-94 in Fergus Falls. Proposed work includes a new bridge, ramp redesign, bicycle and pedestrian safety improvements, and more.

Three design alternatives have been developed to address the project purpose and need. MnDOT is looking for your input on current issues and opportunities within the study area and comments on the three alternatives. The three alternatives include:

- Alternative A: North Roundabout Option
- Alternative B: North Signal Option
- Alternative C: South Roundabout Option

Learn more about the project and provide your input by visiting the project webpage to:

- Review the three alternative layouts
- Participate in the online survey (Open through May 16)
- Stay connected for project updates
