

2022 Construction

Highway 55/59 Elbow Lake to Barrett

This year, MnDOT will resurface and widen shoulders on Highway 55/59 between Elbow Lake and Barrett. Other improvements include: realigning County Road 54 and Third Street, constructing turn lanes at CR 8 and CR 21, replacing culverts, snow sloping and installing a pedestrian ramp in the City of Barrett.

Schedule: July 25 – end of October

Construction details: The bulk of the work will take place between CR 54 and CR 21 (Phase 1). The detour will follow CR 54 and CR 8 through October. In mid-September, crews will begin Phase 2. The detour route will be extended temporarily to include CR 25 and CR 1/Division Street, while construction is completed at the CR 54 intersection. Then, they'll work under traffic (lane closures, flaggers) between CR 21 and Park Street in Barrett.

Live or work on Hwy 55/59? Driveway access will be maintained, but sections of the roadway may be temporarily impassable during culvert replacements. During Phase 2, expect delays between CR 21 and Barrett.

Other highway projects that may impact your commute

In addition to the project on Highway 55/59, there are two other projects currently in progress in the area. Each project is being detoured, and there will be overlap in schedules.

- **Hwy 9 Mustinka River Bridge** – In progress, bridge out near Norcross and road closed through late August. Project website: mndot.gov/d4/projects/hwy9mustinka.
- **Grant County Road 10** - In progress. Grading and paving between CR 2 in Barrett and Hwy 79. Detour follows Hwy 79 and CR 21. During Phase 2, starting in mid-September, motorists using the CR 10 detour will encounter lane closures, flaggers and delays on Hwy 55/59 for a few weeks.
