

Configuring Audio for Use with Remote Desktop Connection

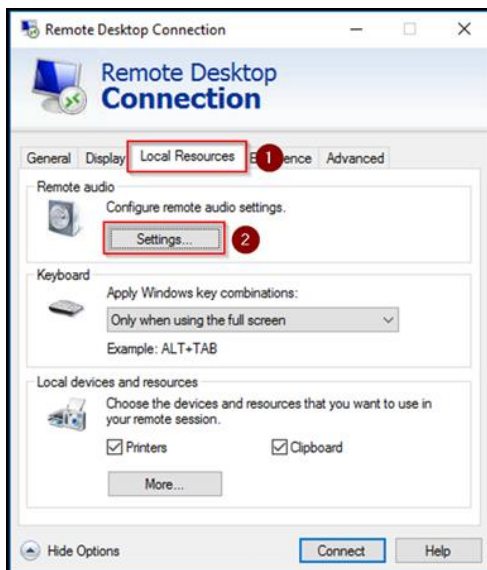

1. From the StoreFront, click the *Desktops* tab, then click on the *MnDOT Remote Desktop Client* icon:

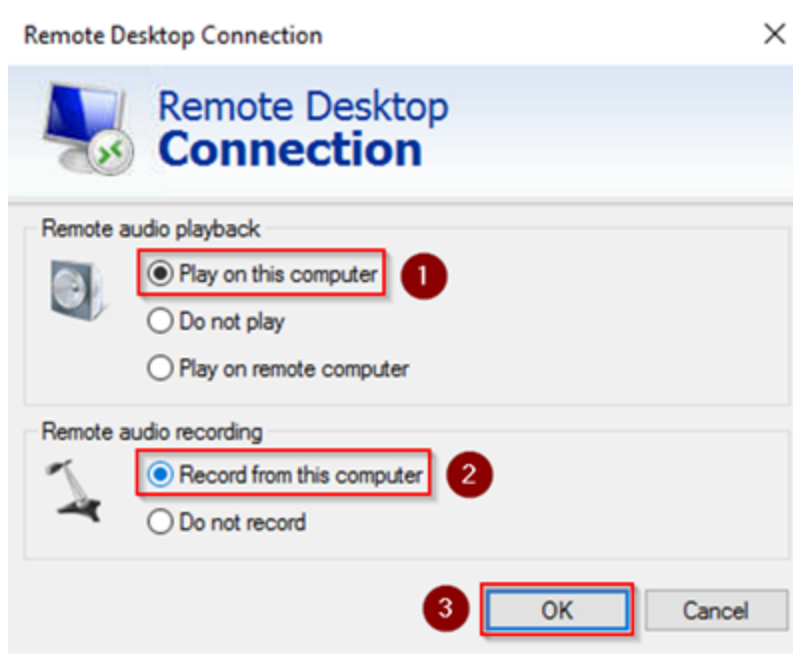

2. The *Remote Desktop Connection* window appears. Click *Show Options*:

3. The *Remote Desktop Connection* window expands to show several tabs. Click the *Local Resources* tab (1), then click *Settings* (2):

4. The *Remote Desktop Connection Audio Settings* window appears. Click *Play on this computer* (1), then *Record on this computer* (2), then *OK* (3):

5. The *Remote Desktop Connection* window reappears. Click *Connect*).

Your audio should be streaming to your local audio devices.
