BONNELL PREWET SYSTEMS
COMMANDER BODY PREWET SYSTEMS

Commander Body Prewet Systems allow maximization of liquid capacity per length of body. These systems offer convenient crossover plumbing options and are installed on welded or bolted tank brackets. Crossover plumbing is limited to 1-1/2", but 2" Quick Fill is available on the options page. Standard brackets are sloped for material and moisture shedding except on the 540 gallon systems which have flat brackets. Single tank systems are available on special request. Brackets are not included in below prices. **YOU MUST CHOOSE TANK BRACKETS BELOW and ADD FACTORY INSTALL.**
