Notice: The application contact must be an employee of the Airport Sponsor.

Application Questions:

1. What piece of equipment are you requesting? (please attach spec sheet)
 - a. Name/type of equipment:
 - b. Model:
 - c. Approx. Price:
 - d. Any other relevant information:
2. Justify equipment need.
 - a. If a mower is being requested, please specify:
 - i. How many acres will be cut if a mower is obtained, and
 - ii. Which areas the mower be used for (i.e., turf runway, grass around runway, grass by hangars).
 - b. If snow removal equipment is being requested: specify which pavements/areas this piece of equipment will be used for (i.e., parking lot, taxiways, runway)?
 - c. Is this piece of equipment being requested dual purpose? If yes, what are the uses for it? If it is for mowing or snow removal, what areas will it be used for?
 - d. Is the piece of equipment that is being requested an attachment? If yes, what will the attachment be used for?
 - e. Please provide any other important information to justify equipment need if not already provided in a previous question.
3. Will you be trading in an old piece of equipment? If yes:
 - a. Was this older piece of equipment purchased with a previous grant? If yes, please provide date it was purchased.
 - b. What is the reason for replacing? (e.g., are there issues with the equipment?)

4. If awarded a grant, do you agree to claim the labor and all maintenance costs associated with the use of this equipment on your maintenance and operation quarterly reimbursement submittals?
5. For NPIAS (National Plan of Integrated Airport Systems) airports only:
 - a. Is the piece of equipment federally eligible?
6. Please list equipment purchased by the airport in the past with grants from MnDOT?
7. Please attach any documents that will support the justification of need for this piece of equipment. (This can include repair documents, 5010 documents and any other relevant information.) Any document uploaded needs to be named with the documentation type and airport ident. (I.e. AXN-5010 report.pdf)
