

Distribution: 71

MINNESOTA DEPARTMENT OF TRANSPORTATION Developed by: Engineering Standards Issued by: Engineering Standards	TRANSMITTAL LETTER NO. 5-297 (83-14) MANUAL: Standard Plates DATED: September 30, 1983
SUBJECT: Revised Standard Plates	

The attached Standard Plates have been given approval by the FHWA and may now be referenced by their appropriate number in the plans.

3124B Metal Apron Connection

The note referring to dimple and standard corrugated band was incorrect. The bar, bolt and strap fastener should refer to the dimple band. The note was reworded to make the correction.

7020J Concrete Curb (2 sheets)

On sheet 2 of 2, the length of the No. 4 reinforcing bar was changed. As dimensioned, the bar would have reached approximately to the back face of the curb. The horizontal leg was changed to 2'0". In addition, values for the width of the BR H-H₁ curb ("A") were added and the 11" and 12" values were deleted since these values are seldom or never used.

INSTRUCTIONS:

1. Record transmittal letter number, date and subject on the transmittal record sheet in the front of the manual.
2. Remove 3124A (backside blank) and 7020I - 1 of 2 (backside 7020I - 2 of 2).
3. Insert 3124B (backside blank) and 7020J - 1 of 2 (backside 7020J - 2 of 2).
4. Any technical questions regarding this transmittal should be directed to Raymond Adolfson, (612) 296-6116.
5. Any questions concerning the distribution of this material should be directed to Maria Fratturelli, (612) 296-3383.
6. Please furnish any address changes in writing to Kay Korsgaard, Map and Manual Sales, Room B-20, Transportation Building, St. Paul, MN 55155.
