

# Roadway Type describes the asset's location

## Highway Culverts

## Side Culverts

## Mainline (Storm Drain)

"Highway" Culverts" have two open ends and are under highway traffic lanes:

- Centerline – drainage crosses the entire highway
- Median – feature drains the median ditch
- Ramp/Loop – feature is on a ramp or loop
- Collector-Distributor is a separate parallel lane at a freeway interchange
- (Mainline describes storm drain not culverts)
